## PROJECTS

---

**SportsPro Technical Support** | C# | ASP.NET Core MVC | Entity Framework Core | SQL Server

- Built a database-backed support management system for products, customers, technicians, and incidents.
- Implemented MVC CRUD workflows, Entity Framework queries, related data handling, and incident filtering.

**Simple Forum Application** | PHP | MySQL | PDO | Sessions | Bootstrap

- Developed a dynamic forum with registration, login, categories, posts, and session-based access.
- Used PDO prepared statements and password hashing to support database-backed user interaction.

**Display Switcher CLI** | Go | Cobra | JSON | Windows Automation

- Built a Go CLI for switching Windows display profiles and launching workflow-specific applications.
- Designed JSON-based profiles and commands for listing, inspecting, applying, and dry-running actions.

**Godot Grid Roguelike Prototype** | Godot | C# | Game Systems

- Built a turn-based grid roguelike with combat, enemy turns, rewards, abilities, and persistent run state.
- Organized player state, combat effects, gear bonuses, and scene flow using C# classes.
